RIFLESCOPES

DEAD-HOLD[®] BDC MOA

Customized hashmark design helps eliminate guesswork on holdover and windage corrections. Good for hunting and shooting at varying ranges, where estimating holdover is a concern.

ILLUMINATED DEAD-HOLD[®] 2A BDC

Pairs the trusted holdover and windage guidance of the Dead-Hold[®] BDC with an illuminated floating center dot for fast, precise aiming in low light. Designed for hunting and shooting at varying distances where holdover estimation matters.

MUZZLELOADER BDC MOA

Specially calibrated for the slower velocities of modern muzzleloaders. This reticle ensures accurate holds over distance, giving you confidence in longer shots.

STRAIGHT-WALL BDC MOA

The Straight-Wall BDC MOA reticle is optimized for popular straight-wall cartridges including .450 Bushmaster, 350 Legend, and .45-70 Government.

V-PLEX MOA

The V-Plex is a popular, all-purpose hunting reticle for a wide variety of applications.

WIDERANGE PLEX[™] MOA

Designed for open terrain and extended-range shooting, its thinner crosshairs reduce obstruction, giving you the clarity and focus to lock in on small, distant game.
